## SUMMARY

A graduate in Information Technology from Muhammadiyah University of Yogyakarta with practical experience in building responsive and interactive web applications using React.js, JavaScript, HTML and CSS. I have a proven track record in developing information systems for government agencies such as the KPK and the Yogyakarta Communication and Information Agency. In addition to being a developer, I have an interest in Quality Assurance (QA) or Testing, supported by experience in conducting User Acceptance Testing (UAT) and functional testing to ensure system suitability. I also have experience as a Data Analyst at the KPK, where I processed and analysed staff attendance data to support strategic decision-making within the HR department. With a Microsoft Office Specialist (Excel) certification and proficiency in SQL and MySQL, I am able to manage and validate data technically and accurately.

## INTERNSHIP EXPERIENCE

### Komisi Pemberantasan Korupsi (KPK)

Nov 2026-Present

Front-End Developer Intern

- Contributed as a Front-End Developer in a team to develop 2 web-based applications using React.js, focusing on building responsive, interactive, and user-friendly interfaces.
- Implemented reusable components, managed state effectively, and ensured optimal performance across different devices and browsers.
- Collaborated with backend developers to integrate RESTful APIs and ensure seamless data synchronization within the system.
- Conducted User Acceptance Testing (UAT) and performed application testing to identify bugs, validate features, and ensure the system meets business requirements.
- Processed and analyzed attendance data, applying basic data analysis to support HR decision-making within KPK.
- Served as a committee secretary in a KPK social event (Sunatan Massal), handling administrative tasks, documentation, and coordination to ensure smooth event execution.

### Dinas Komunikasi Informatika dan Persandian Kota Yogyakarta

Jun 2024 – Aug 2024

Front-End Developer Intern

- Developed a web-based monitoring dashboard using HTML, CSS, and JavaScript that digitalized 3 key reporting processes, reducing manual workload for staff by 40%.
- Implemented responsive UI components based on 12+ wireframes from the UI/UX team, ensuring consistent design across devices.
- Collaborated with 2 backend engineers to integrate API endpoints and improve system data accuracy, resulting in 30% faster data retrieval.
- Participated in stakeholder meetings to gather requirements, present progress, and refine system features based on user feedback.

## EDUCATION

### Universitas Muhammadiyah Yogyakarta

Sep 2021 - Sep 2025

Bachelor of Information Technology | GPA 3.43/4.00

## CERTIFICATIONS AND COURSES

- Microsoft Office Specialist (MOS) Excel 2019 Associate – Certiport | 2025**  
Demonstrated proficiency in advanced Excel functions, data analysis, and spreadsheet management.
- TOEIC Model Test – Score: 617 | 2024**  
Proven English proficiency in listening and reading comprehension at an intermediate-upper level.

## ACADEMIC PROJECTS

### Anasera Center Pusat Terapi Tumbuh Kembang Anak

Mar 2025 – Jul 2025

Web Developer (Final Project)

- Designed and developed a full-stack website using HTML, CSS, JavaScript, Laravel, and MySQL, covering all core operational workflows.
- Built features for service management, online registration, patient reservation history, consultation, and data administration for patients and therapists.
- Created a responsive and user-friendly interface optimized for desktop, tablet, and mobile access.
- Improved authentication and data-security processes by integrating Laravel middleware and validation layers.

## Library Management System

2024

### Web Developer

- Developed a web-based library system in Laravel with complete CRUD functionalities for books, authors, categories, and loan records.
- Implemented role-based authentication and authorization to separate staff and borrower access.
- Designed clean and responsive interfaces using HTML, CSS, and JavaScript to support smooth navigation.
- Created a searchable book catalog and staff dashboard for easier monitoring of loans, returns, and inventory.

## Shopping List Application

2024

### Kotlin Project Team

- Built essential shopping-list features—add, edit, delete, and display—using Kotlin functions and structured XML layouts.
- Designed application architecture using an MVVM-style approach and presented the full workflow to project evaluators.
- Developed intuitive UI components connected to Kotlin-based View handling to support clear and simple user interaction.
- Collaborated using Git for version control, coordinating module integration with team members throughout development.

## Frozen Food Database Development

2022

### MySQL Developer

- Designed the ERD and relational database schema covering tables for products, stock, categories, suppliers, and transactions.
- Applied primary keys, foreign keys, and constraints to ensure accurate data relationships.
- Executed CRUD operation testing to validate reliability and consistency across all tables.
- Ensured database integrity by reviewing relationships and refining the schema to minimize redundancy.

## ORGANIZATIONAL AND COMMITTEE EXPERIENCE

### Kuliah Kerja Nyata

Aug 2024

#### Publication, Design, Decoration & Documentation

- Produced visual and informational materials for event communication, managing 15+ publication outputs across print and digital media to expand audience reach.
- Documented the full program through 300+ photos and videos, creating an organized archive used for reports and future publications.

### MATAF Teknik – New Student Orientation

Sep 2022

#### Health Staff

- Provided first aid and handled health-related incidents for 200+ participants and committee members during orientation activities.
- Coordinated with safety and logistics teams to maintain a secure environment and ensure immediate response to emergencies.

### MATAF TI – New Student Orientation

Sep 2022

#### Head of Consumption Division

- Managed meal planning, budgeting, and distribution for 250+ participants and committee members, ensuring accurate portions and timely delivery.
- Coordinated with 5+ event divisions and vendors to maintain smooth consumption flow throughout the entire event.
